EDUCATION

Sohag University, Faculty of Computers and artificial intelligence

B.S. in Computer Science   *June 2024*
                                                              GPA: 3.54/4.00

TECHNICAL SKILLS

Programming Languages

- C++   - JavaScript / Typescript
- Python   --HTML/CSS

Technologies & skills

 -React.js
 -Tailwind CSS   -Git
 - Data Structure & Algorithms

PROJECTS

Movies watchlist app

- Integrated with OMDB API to seamlessly fetch and display movie data.
- Implemented watchlist & watched list functionality, allowing users to add or remove movies.
- Technologies: React, Tailwind CSS, Daisy UI, and Vite.

Budget App

- Created a user-friendly application enabling users to efficiently manage their budgets by adding, tracking, and categorizing expenses within specified budget categories
- Technologies: React, React Bootstrap, and Vite.

Restaurant web app

- Developed a responsive UI, leveraging React Router DOM to facilitate seamless navigation across various routes.
- Real-Time Shopping Cart System: Implemented a dynamic shopping cart using React Context API, allowing users to add and remove items instantly for an efficient and interactive ordering process.
- Technologies: React, TypeScript, Tailwind CSS, and Vite.
